ABOUT TECHNEXT

An Odoo partner that plugs into your system.

TechNext Pte. Ltd. is a Singapore-based Odoo Ready Partner. For Philippine companies we lead with Odoo, set up by our own experts for BIR requirements: e-invoicing planning, CAS or CBA books, 2307s and alphalists. We are an affordable, SME-friendly Odoo partner: you keep the company system you run today (QuickBooks, Xero, SAP Business One, Excel or an in-house tool) and we plug Odoo in beside it for accounting and the BIR books and forms. We also implement Odoo ERP end to end. Every project starts with a fixed, written quote, so there is no need to replace your current system.

Sales, discovery and on-site work run from our Singapore headquarters. Odoo configuration, custom modules and integrations are built at our main development and consulting hub in Taguig City, Metro Manila, and our Ho Chi Minh City hub supports the engineering work. One project, one team, and the same people after go-live.

HOW WE WORK

- **Discovery before a pitch.** We map how the business runs before we propose anything.
- **Standard first.** Configure before customising; custom only where it earns its place.
- **Written scope and quotation.** You see what is included, and what is not, before work starts.
- **Yours to keep.** Accounts, data, sites and master files stay in your name.

HOW WE ENGAGE

Every engagement starts with a written scope.

We don't publish a price list, because no two businesses run the same way. Tell us what's manual today, and we come back with a scope and a quotation that states what is included and what is not. Nothing commits you until you say so.

01

Project

One-off, with a fixed, written quote before work begins.

Used for: **BIR set-up · implementation · customisation · integration**

02

Support plan

Agreed response targets, tracked on every ticket.

Used for: **Odoo support after go-live**

03

Standalone discovery

A written scope that is yours to keep, with or without us.

Used for: **Odoo consultation & discovery**

HOW WE ENGAGE · CONTINUED

Clear on cost, ownership and sign-off.

Odoo licences

Billed by Odoo, per user per month, in your name. Our work is quoted separately, so you can see each part clearly.

Ownership

Databases, accounts and files stay in your name, handed over completely. Odoo plugs into your current system, so there is no need to replace it.

Approval

Configuration, books and forms are shared for sign-off before go-live.

Service page anatomy

1	**Reference code.** Quote it when you write to us, for example BIR-01
2	**What it is.** The service in one headline and a short summary
3	**Illustrated workflow.** A drawn diagram or sample screen, never client data
4	**What's included.** What the scope covers
5	**Specification.** Who it suits, how it is delivered and what you keep
6	**Odoo apps involved.** The apps the work touches, where there are any
7	**Questions clients ask.** Short answers to what we hear most

01 · BIR COMPLIANCE

02 · ODOO ERP

01

PRACTICE 01 · BIR COMPLIANCE

BIR requirements, set up in your Odoo.

E-invoicing by 31 December 2026, CAS or CBA registration, 2307s, SLSP, SAWT, QAP and audit requests. We advise first, set Odoo up for BIR requirements, and stay on after go-live.

BIR-01	BIR E-invoicing Preparation	p. 13
BIR-02	CAS & CBA Registration Support	p. 15
BIR-03	BIR Forms & Withholding in Odoo	p. 17
BIR-04	BIR Audit Records	p. 19

BIR COMPLIANCE · WHERE IT HURTS

What finance teams tell us before an Odoo project.

Eight BIR pains we hear in almost every Philippine discovery call, and what changes once the BIR work lives in one system. Each row points to the service that addresses it.

TODAY	IN ODOO, SET UP BY TECHNEXT
Invoices that can't be sent A printed or emailed PDF. If the system can't transmit sales data to the BIR, it needs work before 31 December 2026.	BIR-01 Invoice flows set up in Odoo; how invoice data reaches the EIS is scoped with you
2307s typed by hand Certificates re-typed and chased every quarter.	BIR-03 2306 and 2307 PDFs generated on vendor bills and, if requested, sent with the payment
Month-end in Excel SLSP, SAWT and QAP rebuilt from spreadsheets.	BIR-03 DAT exports from the same entries as your books
Missing customer 2307s A missing certificate is a credit you can't claim.	BIR-03 Each received 2307 attached to its invoice, with the gaps listed for follow-up

BIR COMPLIANCE · WHERE IT HURTS · CONTINUED

TODAY	IN ODOO, SET UP BY TECHNEXT
CAS paperwork	BIR-02
A system description and sample outputs written from scratch.	The application pack printed from the Odoo you will actually use
Upgrades and the registration	BIR-02
A major change adopted without an updated registration leaves the registration without effect from that date.	The registration update planned alongside each Odoo upgrade
Branches doing it differently	BIR-01
Each branch with its own spreadsheet and invoice habits.	One database: each branch its own journal and series, one consolidated 2550Q
Digging for an audit	BIR-04
Ten days to answer an eLA request, with records in five places.	Audit trail, locked periods and attachments: easier to find and export

Who must e-invoice by 31 December 2026

RR 26-2025 · RMC 98-2026

Covered
E-commerce sellers
Small, medium or large

Covered
LTS accounts
Large Taxpayers Service

Covered
Large taxpayers
RA 11976, RR 8-2024

Covered
CAS or CBA users
With invoicing software

Exempt
Micro taxpayers
Any channel

The BIR Commissioner can require other taxpayers to comply; exporters, incentive-registered enterprises and POS users join later. We confirm your group with your accountant in discovery.

BIR COMPLIANCE · SELF-CHECK

Twelve questions. Tick what is true today.

Three or more boxes left empty, or "not sure"? Bring these pages to a discovery call. An adviser will say what Odoo covers, what it takes, and what to do first before 31 December 2026.

E-invoicing

BIR-01

- [ ] We know whether we are covered by the 31 December 2026 deadline
- [ ] Our system can transmit invoice data to the BIR's EIS, not just print it
- [ ] We have a plan for corrections and for system downtime

Registration

BIR-02

- [ ] Our accounting system is registered as a CAS or CBA for the system we use today
- [ ] We registered our computerised books in ORUS this year
- [ ] No upgrade or new module has changed the system since we registered

BIR COMPLIANCE · SELF-CHECK · CONTINUED

Forms and withholding

BIR-03

- [ ] Our 2307s are generated from bills, not typed by hand
- [ ] SLSP, SAWT and QAP come from our books, not a separate spreadsheet
- [ ] Our invoices show creditable withholding as a separate item (RR 6-2026)

Audit

BIR-04

- [ ] We could produce an examiner's checklist within 10 calendar days
- [ ] Each period is locked after its returns are filed
- [ ] Every bill and invoice is stored with its source document

From "are we covered?" to an e-invoicing plan for your Odoo

1
Confirm your group
With your accountant: covered now, later, or exempt

2
Map your invoice flows
Invoices, credit notes, branches, anything issued outside your system

3
Set up the localisation
Taxes, withholding, BIR reports and invoice layouts, tested on your data

4
Plan the EIS route
What your Odoo version and hosting would need, quoted separately

5
Prepare PTI papers
You apply; we prepare the process flow and sample invoices from your Odoo

6
Go live and stay on
Downtime and correction flows set up before go-live, then support

BIR-01 BIR E-INVOICING PREPARATION

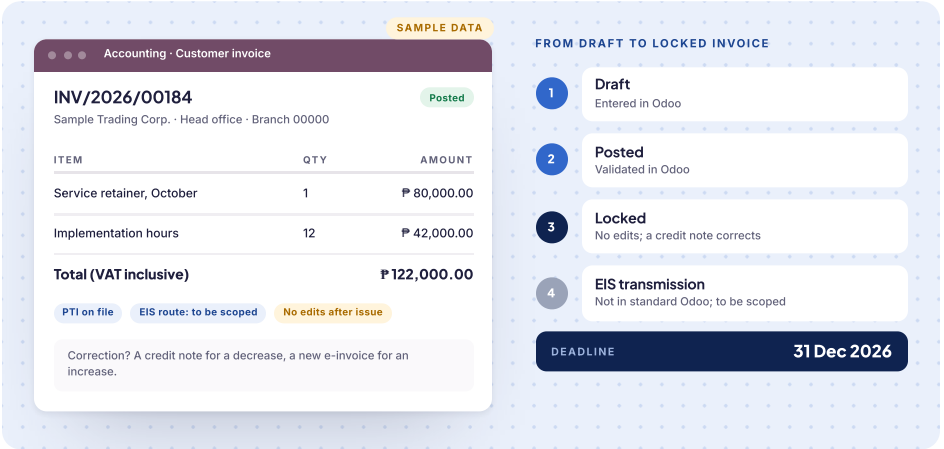

Preparing for BIR e-invoicing.

Covered businesses must issue e-invoices the BIR can receive, not PDFs from a printer. We help you confirm whether you are covered and set up Odoo's invoice flows. Odoo has no built-in EIS connection; any connection is quoted separately.

MODEL	DEADLINE	APPLIES TO
Project, fixed written quote	**31 Dec 2026**	**Head office and every branch**

A SPECIFICATION

BEST FOR	E-commerce sellers, large taxpayers and CAS or CBA users with invoicing software
SEQUENCE	PTI first, then EIS Certification within six months (RMC 98-2026)
BRANCHES	Every branch e-invoices; one system for all of them is simplest
PERMIT	Issued to your business for the system you register
ODOO APPS	Accounting · Invoicing · Sales · Documents

BIR-01 BIR E-INVOICING PREPARATION · CONTINUED

B WHAT'S INCLUDED

- **Coverage check** with your accountant: covered now, later or exempt
- **Invoice flow map**: invoices, credit notes, branches and anything issued by hand
- **EIS route, scoped with you**: Odoo has no built-in connection to the BIR's EIS, and TechNext has not built one
- **No-edit flows**: credit notes for decreases, new e-invoices for increases
- **Downtime plan**: a manual invoice, later replaced by an e-invoice
- **PTI papers**: you apply; we prepare the process flow and sample invoices from your Odoo

C QUESTIONS CLIENTS ASK

Q Are we covered?

Covered now: e-commerce sellers above micro, LTS accounts, large taxpayers and CAS or CBA users. Micro taxpayers are exempt.

Q Isn't a PDF invoice enough?

No. Under RMC 98-2026, a system that only prints invoices is not e-invoicing.

Q Is Odoo BIR-accredited?

No software is. The BIR has accredited no e-invoicing provider (advisory, 14 Sep 2026).

BIR-02 CAS & CBA REGISTRATION SUPPORT

Prepare Odoo for your CAS or CBA application.

The BIR registers your use of a system, not a software brand. Keep your current system: we plug Odoo in for the books and prepare the sample printouts with you. You register at your RDO; the decision is the BIR's.

MODEL	FILED AT	EVERY YEAR
Project, fixed written quote	**Your RDO or LT office**	**You register books in ORUS**

A SPECIFICATION

BEST FOR	Businesses moving their books into Odoo, and large taxpayers, who must use a CAS
OUTCOME	A complete application pack; the RDO decides
IN ODOO	Audit trail, hash-secured entries, hard lock dates, Book of Accounts
FILING	Your business files; we prepare the pack with you
ODOO APPS	Accounting · Invoicing · Documents

BIR-02 CAS & CBA REGISTRATION SUPPORT · CONTINUED

B WHAT'S INCLUDED

- **CAS or CBA**: decided by whether your invoices are system-generated
- **Requirements check** against Annex B of RMC 5-2021
- **Application pack** printed from your Odoo: invoices, books, reports, audit trail
- **Cloud set-ups**: the joint sworn statement for Odoo Online or Odoo.sh
- **Book exports** for your own yearly ORUS registration
- **Upgrade planning**: the registration update planned with each major upgrade

C QUESTIONS CLIENTS ASK

Q Is there still a Permit to Use?

No. Since RMC 5-2021 the RDO issues an Acknowledgement Certificate and evaluates afterwards.

Q Does that let us e-invoice?

No. Covered taxpayers also need a Permit to Issue. See BIR-01.

Q Do sister companies register separately?

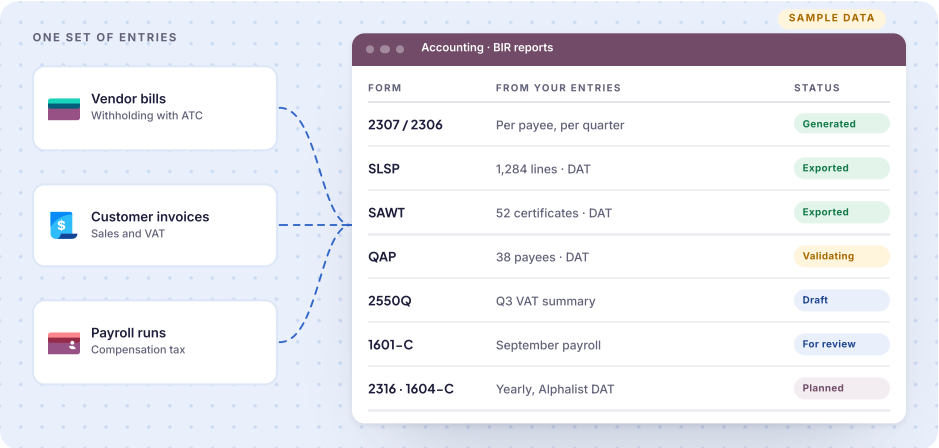

Yes, even on a shared system. In Odoo each is its own company.

BIR-03 BIR FORMS & WITHHOLDING IN ODOO

2307s, SLSP, SAWT and QAP from your entries.

No more re-typing certificates or rebuilding alphalists in Excel. Odoo's Philippine localisation produces the main BIR reports from the entries you already post; we compare them with your last filings.

MODEL	EXPORTS	CHECKED
Project, fixed written quote	**DAT files for the BIR's tools**	**Against last period's filings**

BIR-03 BIR FORMS & WITHHOLDING IN ODOO · CONTINUED

A WHAT'S INCLUDED

- **Withholding taxes with ATC codes**, mapped with your accountant
- **2306 and 2307 PDFs** on vendor bills, sent on payment if requested (Odoo 20)
- **SLSP, SAWT and QAP** as DAT files, from the same entries as your books
- **VAT and percentage tax**: 2550Q, 1600-VT, and 2551Q for non-VAT companies
- **Basic PH payroll (Odoo 20)**: 1601-C items, 2316, 1604-C worksheets, Alphalist DAT
- **Invoice layout**, withholding as a separate item (RR 6-2026): TechNext configuration

B SPECIFICATION

BEST FOR	Finance teams rebuilding BIR forms from spreadsheets every quarter
REPORT CHECK	Odoo's reports compared line by line with last period's filings
COMPANY RECORD	TIN with branch code and RDO, for the report headers
RATES AND DATES	Confirmed with your accountant; we set up the system
ODOO APPS	Accounting · Purchase · Payroll · Sales

C QUESTIONS CLIENTS ASK

Q Can Odoo generate BIR Form 2307?

Yes. Odoo 20 generates 2306 and 2307 PDFs in the BIR format from vendor bills.

Q And the 2307s customers give us?

Each can be attached to the invoice it covers, and the SAWT is built from them.

Q Does Odoo run Philippine payroll?

Odoo 20 adds basic PH payroll: 1601-C items, the 2316 report and 1604-C worksheets.

BIR-04 BIR AUDIT RECORDS

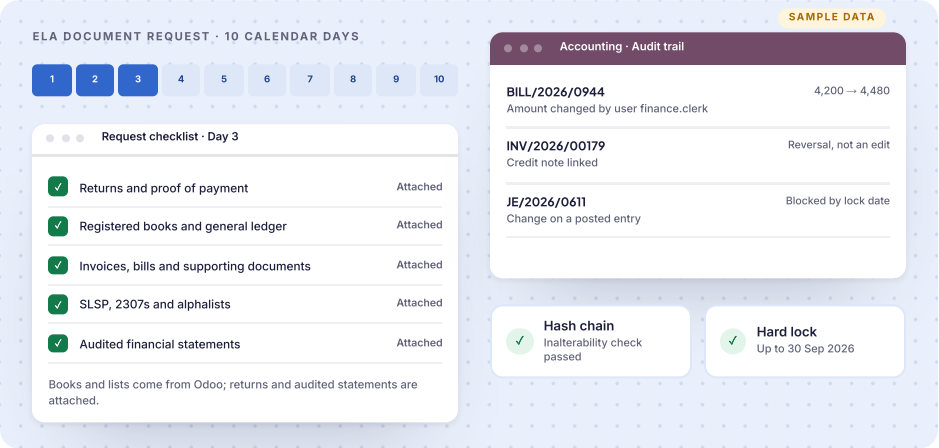

Records in order before an eLA arrives.

You have 10 calendar days to hand over requested records (RMO 22-2026). We set Odoo up so posted entries keep their history and records are easier to find and export.

MODEL	WINDOW	RETENTION
Project or support plan	10 days to submit	Five years minimum

A SPECIFICATION

BEST FOR	Companies expecting an eLA, with records kept in several places
AUDIT RULES	Generally one eLA per taxable year, all taxes (RMO 1-2026)
RETENTION	Five years from the day after the filing deadline (Sec. 235)
OUR PART	We help organise the records in Odoo; your accountant leads the audit
ODOO APPS	Accounting · Documents · Invoicing

BIR-04 BIR AUDIT RECORDS · CONTINUED

B WHAT'S INCLUDED

- **Audit trail**: who changed what and when, with old and new values
- **Secured entries**: posted entries hash-chained and checked
- **Lock dates** after each filing, including hard locks
- **Source documents** attached to every bill and invoice
- **A filing pack per quarter**: return, report and proof of payment
- **A mock request** once a year, against the ten-day window

C QUESTIONS CLIENTS ASK

Q What do examiners ask for?

Returns, registered books, invoices and bills, the SLSP, 2307s, alphalists and audited statements.

Q Can a posted entry be edited?

Posted entries can be hash-secured and locked by date; the audit trail logs changes.

Q Do we still keep ten years?

The legal minimum is now five years; many accountants advise longer.

BIR COMPLIANCE · THE RULES BEHIND IT

The issuances that shape your Odoo setup.

The BIR registers your business and your system, not a software brand.

ISSUANCE · DATE	WHAT IT MEANS FOR YOUR SYSTEM
RR 7-2024 (EOPT Act) 11 Apr 2024	The invoice replaces the official receipt as proof of sale
RR 8-2024 11 Apr 2024	Taxpayer classes, micro to large, that decide whether e-invoicing applies now
RMC 5-2021 · RMO 9-2021 2021	CAS and CBA registration: Acknowledgement Certificate, no Permit to Use
RMC 4-2026 15 Jan 2026	Computerised books registered online through ORUS, every year
RR 26-2025 5 Sep 2025	E-invoicing deadline moved to 31 December 2026 for the covered groups
RMC 98-2026 22 Sep 2026	Working rules: PTI first, EIS Certification within six months, no edits after issue, every branch
RMC 110-2026 12 Oct 2026	Accreditation rules for e-invoicing service providers
RR 6-2026 In force 16 Oct 2026	Creditable withholding tax shown as a separate item on invoices
RMO 22-2026 24 Aug 2026	Audits need a valid eLA, TVN or Mission Order; documents due in 10 days

What Odoo 20 already does

- Invoice layouts for BIR and CAS requirements, and a Book of Accounts for CAS and CBA
- BIR 2306 and 2307 certificates as PDFs, generated on vendor bills
- SLSP, SAWT and QAP with DAT exports, the 2550Q, 1600-VT and 2551Q
- Basic PH payroll: 1601-C items, 2316, 1604-C worksheets

TechNext adds

- No EIS connection: Odoo has none built in and TechNext has not built one; any connection is quoted separately
- Invoice layouts and branch flows checked against the guidelines
- Credit-note and manual-invoice catch-up set up before go-live
- Sample outputs and process flow for the CAS and PTI applications you file

About "BIR-accredited" claims

In its public advisory of 14 September 2026, the BIR said it has not accredited or endorsed any e-invoicing service provider. We say Odoo is set up for BIR requirements; the CAS registration and the PTI are issued to your business. **TechNext is an Odoo Ready Partner.** We are not affiliated with, accredited by or acting for the BIR or any government agency, and we do not file or register on your behalf.

BIR issuances as available on 21 October 2026, summarised on technext.asia (bir-e-invoicing and the BIR guides). General guidance, not tax advice: confirm with your accountant or RDO before acting.

TechNext

02

PRACTICE 02 · ODOO ERP

Odoo ERP, end to end.

Discovery, configuration, data migration, training, integration and support. Accounting, Sales and Inventory first, then the rest of the Odoo suite as the business needs it.

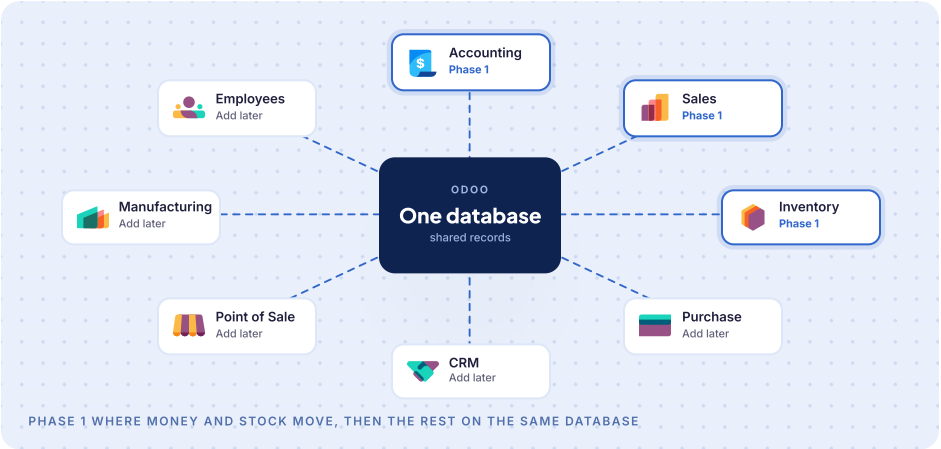

ERP-01	Odoo ERP Implementation	p. 24
ERP-02	Odoo Consultation & Discovery	p. 26
ERP-03	Odoo Customisation	p. 28
ERP-04	Odoo Integration	p. 30
ERP-05	Odoo CRM Customisation	p. 32
ERP-06	Odoo Training	p. 34
ERP-07	Odoo Support & Upgrades	p. 36
ERP-08	Multi-Company ERP for Groups	p. 38

ERP-01 ODOO ERP IMPLEMENTATION

Odoo ERP implementation.

One database where sales, stock, purchasing and accounting share the same records, set up for BIR requirements in the Philippines. We configure, migrate, train and stay on after go-live.

MODEL	STARTS WITH	HOSTING
Project, fixed written quote	**Discovery**	**Online · Odoo.sh · On-premise**

ERP-01 ODOO ERP IMPLEMENTATION · CONTINUED

A WHAT'S INCLUDED

- **Discovery** that maps each process to an Odoo app and a written scope
- **Configuration** on a staging copy, never on your live data
- **Data migration**: customers, vendors and products in full; opening balances and open items
- **Role-based training** on your own data, with written guides
- **Integration** with the banks, payments and tools you keep
- **Custom modules** only where standard features can't meet a real requirement; support options after go-live

B SPECIFICATION

BEST FOR	Growing companies that have outgrown spreadsheets and disconnected tools
PHASE 1	Accounting, Sales and Inventory, with the BIR localisation in the Philippines
DELIVERABLES	Scope, configured database, migrated data, trained users, guides
TIMELINE	Agreed in the written scope; the first phase is kept focused so it goes live sooner
ODOO APPS	Accounting · Sales · Inventory · Purchase · CRM · Point of Sale

C QUESTIONS CLIENTS ASK

Q Do we need every module at once?

No. Apps are switched on as you need them, on the same database.

Q Can we keep some existing systems?

Yes. If it works, we connect it through a standard connector or the Odoo API.

Q Where will Odoo run?

Odoo Online, Odoo.sh or your own servers, decided by custom modules and data residency.

ERP-02 ODOO CONSULTATION & DISCOVERY

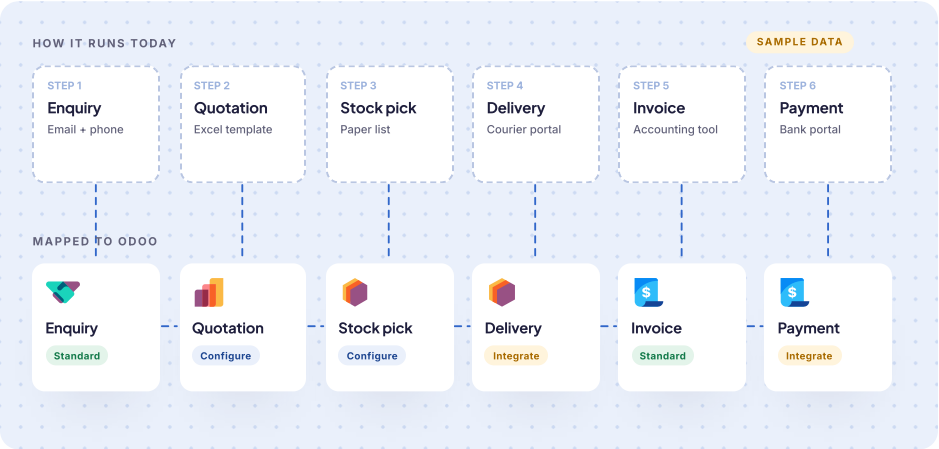

Consultation and discovery.

We map how orders, stock and money move today, match each step to an Odoo app, and hand you a written scope. Discovery stands on its own.

MODEL	FORMAT	OUTPUT
Fixed scope, fixed written quote	On-site in Singapore or remote	Written scope

A SPECIFICATION

BEST FOR	Teams choosing an ERP, or planning a phase two
WHO ATTENDS	Finance, sales, warehouse and operations, plus whoever signs the scope off
YOUR SYSTEMS	Nothing changes during discovery. It is a mapping exercise, not a cut-over
COMMITMENT	None. The scope is yours to keep
ODOO APPS	Accounting, Sales, Inventory, Purchase, Project, Employees

ERP-02 ODOO CONSULTATION & DISCOVERY · CONTINUED

B WHAT'S INCLUDED

- **Process walkthroughs** with the people who do the work: finance, sales, warehouse and operations
- **Process-to-app map** showing which Odoo app covers each step
- **Gap flags**: each step marked configuration, integration or custom development
- **Migration review**: what data has to move and which systems stay
- **BIR and hosting review**: the BIR forms you file, your e-invoicing coverage, and Odoo Online, Odoo.sh or on-premise
- **Written scope and quotation**, yours to act on with us, another partner or in your own time

C QUESTIONS CLIENTS ASK

Q Do we have to commit to a full implementation?

No. The scope and quotation are yours to act on, with us, another partner or in your own time.

Q What if a step doesn't fit standard Odoo?

It is flagged and priced separately, so you can decide whether to build it or change the process.

Q Will you touch our data?

We review what has to migrate and which systems stay, but nothing changes during discovery.

ERP-03 ODOO CUSTOMISATION

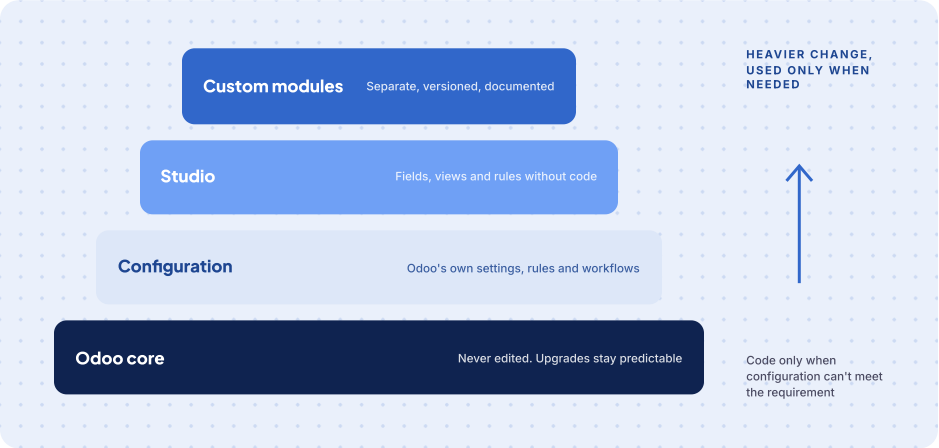

Upgrade-safe customisation.

Tailored modules, workflows, reports and approvals, built so the upgrade path stays predictable. Custom only where it earns its place.

MODEL	BUILT ON	APPROACH
Per module, fixed written quote	Odoo.sh, version-controlled	Standard first

A SPECIFICATION

BEST FOR	Processes that standard Odoo can't meet without changing how you work
PRINCIPLE	If configuration solves it, we configure. If it needs code, it gets a module
UPGRADES	Customisations are separate modules, so upgrades stay predictable
OWNERSHIP	Code and documentation are handed over with the module
ODOO APPS	Studio · Approvals · Spreadsheet (BI) · Documents

ERP-03 ODOO CUSTOMISATION · CONTINUED

B WHAT'S INCLUDED

- **Configuration first**: settings, rules and Studio before any code
- **Custom modules** that live separately and never edit Odoo's own code
- **Workflows and approvals** shaped to how your team signs things off
- **Reports and documents**: quotations, invoices and dashboards in your format
- **Tested and documented** on staging before anything reaches production
- **Upgrade migration** of your modules when you move to a new Odoo version

C QUESTIONS CLIENTS ASK

Q Will customisation break future upgrades?

Not the way we build it. Modules are tested, documented and never edit Odoo's core.

Q Configuration or customisation?

Configuration uses Odoo's own settings; customisation adds code. We pick the lightest option that meets the requirement.

Q Can you build on Odoo Online?

Odoo Online runs standard apps. Custom modules need Odoo.sh or on-premise, which we plan in discovery.

ERP-04 ODOO INTEGRATION

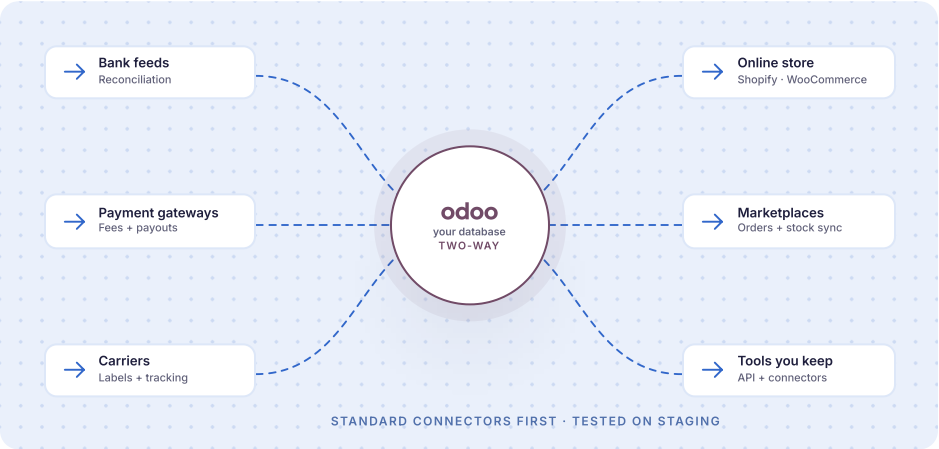

Integrations, connected not replaced.

Bank feeds, payment gateways, online stores, marketplaces, carriers and the tools you keep, joined to Odoo so orders, stock and money stay in step.

MODEL	SYNC	TESTED
Per flow, fixed written quote	One-way or two-way	On staging, real records

A SPECIFICATION

BEST FOR	Companies keeping tools that work, and wanting one set of numbers
CONNECTORS	Standard connectors from Odoo and its app store first; custom only where none is maintained
DOCUMENTATION	Any custom code we write is documented and handed over
GO-LIVE	Every flow tested on staging with real records first
ODOO APPS	Accounting · eCommerce · Inventory · Sales

ERP-04 ODOO INTEGRATION · CONTINUED

B WHAT'S INCLUDED

- **Bank feeds** for faster reconciliation in Accounting
- **Payment gateways** with fees and payouts captured and reconciled
- **Online stores** such as Shopify or WooCommerce, orders and stock in step both ways
- **Marketplaces and carriers** for orders, fulfilment and labels
- **Field-by-field mapping**: the direction of every flow agreed up front
- **Error alerts** to a person, never a silent failure

C QUESTIONS CLIENTS ASK

Q Will Odoo replace our online store?

Only if you want it to. Otherwise we connect your existing store so orders and stock stay in step.

Q Do you build custom connectors?

Only where no maintained connector exists, and any custom code is documented.

Q What if a sync fails?

Error handling alerts a person rather than failing silently.

ERP-05 ODOO CRM CUSTOMISATION

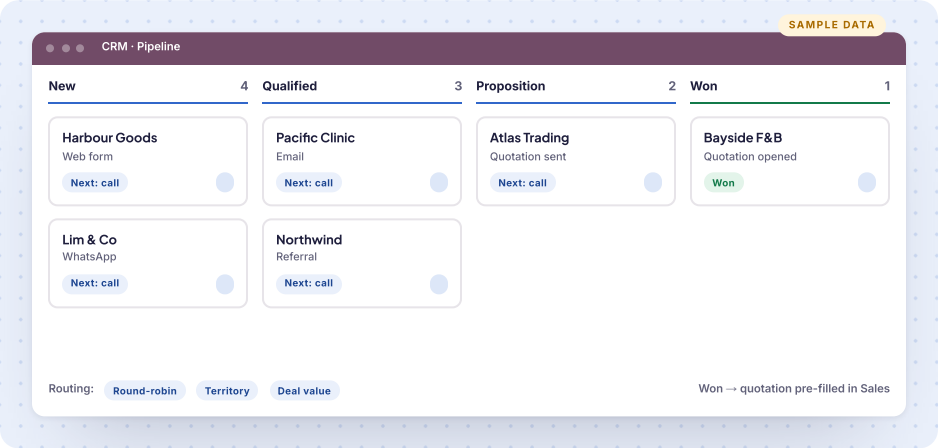

CRM built around how you sell.

Pipelines, lead routing, scoring, quotation hand-off and reporting, matched to your stages and connected to Sales so nothing gets re-keyed.

MODEL	LEAD SOURCES	HANDS OFF TO
Project, fixed written quote	**Web · email · WhatsApp · social**	**Odoo Sales**

A SPECIFICATION

BEST FOR	Sales teams losing leads between inboxes, spreadsheets and quotes
STARTS WITH	A walkthrough of your last ten deals
FLOWS INTO	Sales, Inventory and Accounting on the same record
REPORTING	Pipeline, conversion and activity views your managers use
ODOO APPS	CRM · Sales · WhatsApp · Email Marketing

ERP-05 ODOO CRM CUSTOMISATION · CONTINUED

B WHAT'S INCLUDED

- **Pipeline stages and fields** that mirror your real sales process
- **Lead capture** from website forms, email aliases, WhatsApp and social
- **Routing rules**: round-robin, territory, product or deal value
- **Scheduled activities** so every opportunity has an owner and a next step
- **Quotation hand-off**: a won deal opens a quote with customer, products and pricelist filled in
- **Follow-up reminders** and contact enrichment, reviewed by your team

C QUESTIONS CLIENTS ASK

Q Isn't Odoo CRM fine out of the box?

It's a solid pipeline as-is. The value is in matching it to how you sell and connecting it to Sales.

Q How are leads assigned?

By whatever rule fits: round-robin, territory, product or deal value.

Q What happens when a deal is won?

It opens a quotation pre-filled with the customer, products and pricelist.

ERP-06 ODOO TRAINING

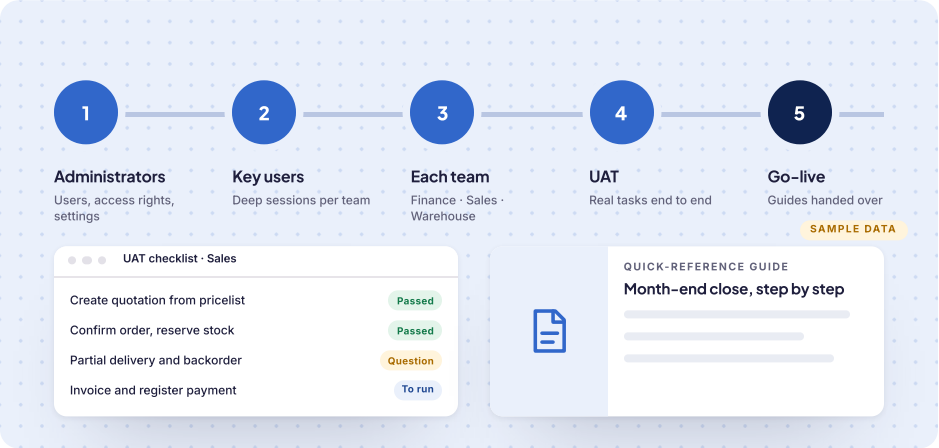

Training on your own data.

Role-based sessions where finance, sales and warehouse teams learn their own screens on a staging copy of your database, with written guides for hand-over.

MODEL	FORMAT	ENVIRONMENT
Per session plan, fixed written quote	**On-site in Singapore or remote**	**Staging copy**

A SPECIFICATION

BEST FOR	New implementations, new hires and teams after an upgrade
WHERE	A staging copy of your database, not a demo
WHO ATTENDS	Administrators first, then each team for its own screens
HAND-OVER	Guides that let you onboard new staff without us
ODOO APPS	eLearning · Knowledge · Accounting · Inventory

ERP-06 ODOO TRAINING · CONTINUED

B WHAT'S INCLUDED

- **Administrator training** first: users, access rights and settings
- **Team sessions** for each role on its own screens
- **Key-user programme** so your own people can train the rest
- **User acceptance testing (UAT)**: real tasks run end to end before go-live
- **Quick-reference guides** written for your setup
- **Refresher sessions** when the team grows or Odoo changes

C QUESTIONS CLIENTS ASK

Q Demo or our own system?

Your own, on a staging copy, so nothing looks unfamiliar on go-live day.

Q What is UAT?

User acceptance testing: your team runs real tasks end to end before go-live, while there is still time to fix gaps.

Q Can we train new hires later?

Yes. The guides let you onboard without us, and we run refreshers on request.

ERP-07 ODOO SUPPORT & UPGRADES

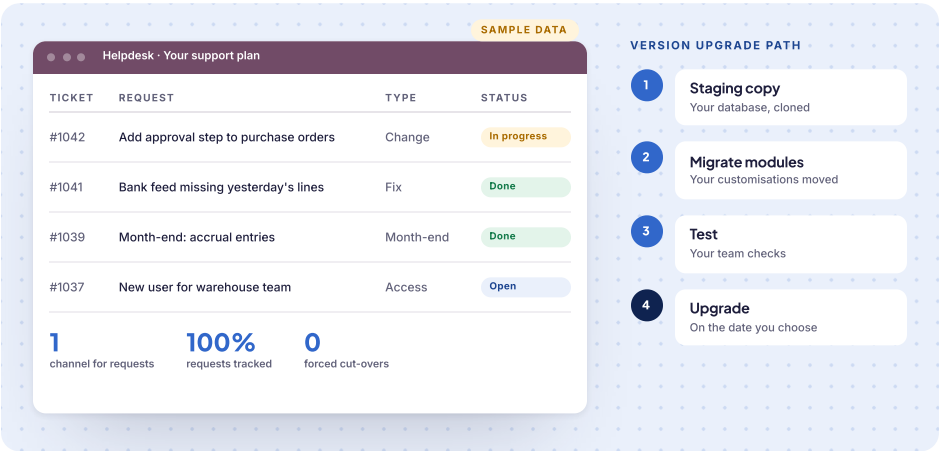

Support after go-live.

Fixes, month-end help, version upgrades and small changes on a plan that fits your team, including Odoo databases we didn't build.

MODEL	CHANNEL	UPGRADES
Support plan, fixed written quote	One tracked channel	On your schedule

A SPECIFICATION

BEST FOR	Companies running Odoo who want one team on call
TEAM	Led from Singapore HQ, consultants and developers in Taguig City; engineering support from Ho Chi Minh City
UPGRADES	Staging test, migrated customisations, never a forced cut-over
PRICED BY	The number of users and apps in use
ODOO APPS	Helpdesk · Project · Accounting · Spreadsheet (BI)

ERP-07 ODOO SUPPORT & UPGRADES · CONTINUED

B WHAT'S INCLUDED

- **Tracked tickets**: every request from open to done, nothing lost in an inbox
- **Response targets** agreed in your plan and tracked on every ticket
- **Month-end help**: 2307s, SLSP, SAWT and QAP prepared in Odoo before each filing; your team files
- **Small changes**: fields, reports, rules and access as the business moves
- **Version upgrades** tested on staging with your customisations migrated
- **Takeover reviews** for Odoo set up by someone else

C QUESTIONS CLIENTS ASK

Q Do you support Odoo you didn't build?

Yes. A short review of the current setup comes first, so we know what we are taking on.

Q What are your response times?

Agreed in your plan and kept realistic to your setup, not a headline number.

Q Will an upgrade break our customisations?

We test on staging, migrate them and upgrade on the schedule you choose.

ERP-08 MULTI-COMPANY ERP FOR GROUPS

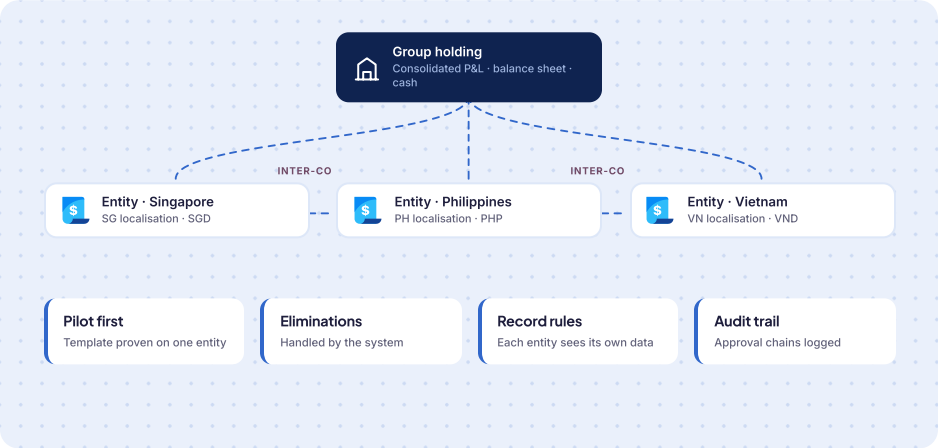

One database for the group.

Multi-company consolidation, inter-company flows, country localisations, governance and a phased rollout, entity by entity.

MODEL	ROLLOUT	HOSTING
Phased, fixed written quote	**Pilot entity, then template**	**Usually Odoo.sh**

A SPECIFICATION

BEST FOR	Groups with several companies or countries
VISIBILITY	People see their company's data and only the group views you grant
DATA	Odoo.sh with staging and version control, or your own cloud where residency requires
PRICED BY	Entities, countries, integrations and custom work
ODOO APPS	Accounting · Invoicing · Approvals · Employees

ERP-08 MULTI-COMPANY ERP FOR GROUPS · CONTINUED

B WHAT'S INCLUDED

- **Pilot entity first**, then the template rolled out company by company
- **Consolidation**: group P&L, balance sheet and cash from the same database
- **Inter-company flows** with eliminations handled by the system
- **Country localisations**: BIR reports in the Philippines, GST in Singapore, each entity on its own rules
- **Governance**: access rights and record rules per entity, approval chains, audit trails
- **Group reporting** rolled up in one currency

C QUESTIONS CLIENTS ASK

Q Do all entities go live at once?

No. Each entity goes live when it is ready, after the pilot.

Q Can each country keep its own tax rules?

Yes. Every entity uses its own localisation while group reports roll up in one currency.

Q Who can see what?

Granular rights and record rules per entity, with approval chains and audit trails.

ODOO APPS WE IMPLEMENT

The full suite, one database.

We implement the full Odoo suite, and our first focus is Accounting, Sales and Inventory. Every app shares the same customers, products and accounts, so adding one later needs no integration project.

FINANCE

Accounting Focus
Journals, bank sync, tax reports, closing

Invoicing
Invoices and online payments

Expenses
Receipts and approved claims

Spreadsheet (BI)
Live pivots and dashboards

Documents
Files with workflows and OCR

Sign
E-signatures with an audit trail

SALES

CRM
Leads, pipeline and activities

Sales Focus
Quotations, orders, upsells

Point of Sale
Offline-ready retail checkout

Restaurant
Tables, kitchen printing, bills

Subscriptions
Recurring billing and renewals

Rental
Book, pick up, return assets

Assistants and agents in Odoo

Odoo app icons are Odoo S.A. marks, shown in their own colours. Licences are billed by Odoo per user per month; Odoo's One App Free plan covers a single app.

OUR IMPLEMENTATION METHOD

Six steps, one team throughout.

01 Discovery

We map how orders, stock and money move today and match each step to an Odoo app. Output: a written scope.

02 Configuration

Apps set up on a staging copy, never on live data. Standard features first.

03 Data migration

Customers, vendors and products in full; opening balances and open items. The old system stays for history.

04 Training & UAT

Role-based sessions on your own data; your team runs real tasks end to end.

05 Integration

Banks, payments, stores and the tools you keep, tested on staging with real records.

06 Go-live & support

Cut-over on an agreed date, then support, fixes, month-end help and upgrades.

OUR IMPLEMENTATION METHOD · CONTINUED

What we need, and what goes first.

WHAT WE NEED FROM YOU

- A short description of how your process runs today
- A decision-maker for scope questions
- The people who run sales, stock and finance, for discovery and training
- Access to the data you want to bring across

TIMELINE

It depends on the number of apps, companies and integrations, and how clean your data is. The timeline is agreed in the written scope at the end of discovery, and the first phase is kept focused so it goes live sooner.

PHASE 1

Accounting

Sales

Inventory

Where money and stock move. Everything else joins the same database later.

WHERE ODOO RUNS

Hosting is a scoping decision.

We recommend hosting during discovery, based on whether you need custom modules and any data-residency rules, never by default.

	ODOO ONLINE	ODOO.SH	ON-PREMISE / YOUR CLOUD
Best for	Fastest start on standard apps	Custom development with staging and version control	Data residency or existing infrastructure
Our default	Most first phases	When a requirement needs custom code	Only when IT policy or data rules require it
Custom modules	No. Configuration, plus Studio on the Custom plan	Yes, version-controlled	Yes
Hosting cost	Included in the Odoo subscription	Hosting fees on top of the Custom plan	Your own infrastructure and operations
Upgrades	Managed by Odoo	Tested on staging, then scheduled	Planned and run with you

WHERE ODOO RUNS · CONTINUED

	ODOO ONLINE	ODOO.SH	ON-PREMISE / YOUR CLOUD
Environments	Production	Production, staging and development branches	As your infrastructure allows
Typical client	Small teams on standard processes	Growing companies and groups with custom needs	Regulated or infrastructure-led organisations
Move later?	Yes, to Odoo.sh or on-premise, tested on a copy before switching	—	—

Standard first
Configuration, then Studio, then custom modules, the lightest option that meets the requirement.

Upgrade-safe
Custom work is built as separate modules, so version upgrades stay predictable.

Your account
The Odoo subscription and database are in your name. You can export your data at any time.

ODOO LICENCES
Priced per user per month by Odoo, and paid to Odoo. Prices differ by country and currency; see odoo.com/pricing for your market.

IMPLEMENTATION
Quoted by TechNext in writing: configuration, data migration, training and integration, with support options after go-live.

LOCALISATION

One database, each country's rules.

Odoo runs a company per country in one database, each with its own localisation, currencies and reports, with intercompany transactions between them. Philippine companies start with the BIR work; these are the Odoo 20 changes we plan around.

Philippines

PH

- Set up for BIR requirements: CAS and CBA books and invoices (BIR-01 to BIR-04)
- BIR 2306 and 2307 certificates generated from vendor bills
- SLSP, SAWT and QAP DAT exports, 2550Q, 1600-VT and 2551Q
- Basic payroll (Odoo 20): 1601-C items, 2316, 1604-C worksheets; SSS and Pag-IBIG loan deductions
- EIS route scoped with you before 31 Dec 2026; Odoo has no built-in EIS connection

LOCALISATION · CONTINUED

Singapore

SG

- GST and IRAS reporting under Odoo 20 localisation
- SFRS-aligned accounting
- Odoo 20 GST refinements toward InvoiceNow (phased 1 Nov 2025 to 1 Apr 2031)
- InvoiceNow through the Access Point you choose; TechNext is not an Access Point
- On-site work from our Waterloo Street HQ

Vietnam

VN

- Odoo 20 follows Circular 99 for accounting
- 01/GTGT VAT reporting
- SInvoice e-invoicing
- Engineering hub in Ho Chi Minh City

Moving to Odoo 20

We upgrade existing databases on a staging copy first, migrate customisations and switch over on the date you choose.

Groups across borders

See ERP-08 for consolidation, inter-company eliminations and access per entity.

Based on Odoo 20 release notes, BIR issuances to RMC 110-2026 and the Singapore GST InvoiceNow timeline, as summarised on technext.asia in October 2026. Confirm your own compliance dates with your adviser.

WHERE WE WORK

Three hubs, one project team.

We work on-site in Singapore and remotely with clients in 25+ countries. Ask us about on-site work at your location.

---

01 Singapore

HEADQUARTERS

261 Waterloo Street, #03-36, Waterloo Centre, Singapore 180261

Sales, discovery workshops and on-site work with clients in Singapore. Support is led from here.

02 Taguig City, Philippines

MAIN DEVELOPMENT & CONSULTING HUB

Level 9, IP Center, Taguig City, Metro Manila

Odoo configuration, custom modules and integrations, with finance, HR, sales and marketing alongside.

03 Ho Chi Minh City, Vietnam

ENGINEERING HUB

62 Nguyễn Thị Nhung, Phường Hiệp Bình, Ho Chi Minh City

Engineering and development support on Odoo projects, alongside the Singapore and Taguig City teams.

WHERE WE WORK · CONTINUED

Hubs across Asia

1
Team after go-live

HOW TO START

Keep your system. Plug Odoo in.

1
Tell us

Set up a meeting at technext.asia/#start or email sales@technext.asia. Tell us which system you run today (QuickBooks, Xero, SAP Business One, Excel or in-house) and which BIR forms you file.

2
Discovery call

We walk through how your company works and what would change. No pitch before we understand the problem.

3
Written scope

We say how Odoo plugs into your current system, and send a fixed, written quote stating what is included and what is not.

4
Go live

We set it up, train your team and support you after go-live.

HOW TO START · CONTINUED

HELPFUL TO INCLUDE IN YOUR FIRST MESSAGE

- Which BIR forms you file, and whether you are covered for e-invoicing by 31 December 2026
- Which services interest you (use the codes in this catalogue)
- How many users, companies and locations
- The system you use today (QuickBooks, Xero, SAP Business One, Excel or in-house); you keep it and Odoo plugs in
- Integrations you know you need: banks, stores, payment gateways
- Any other deadline that matters, such as a financial year-end or InvoiceNow date

PHILIPPINE COMPANIES · START HERE

31 Dec 2026

Covered by BIR e-invoicing? Start before the deadline.

You need a Permit to Issue first, then EIS Certification within six months (RR 26-2025 · RMC 98-2026). Run the twelve-question self-check on p. 11 and bring it to your discovery call.

Who replies?

The TechNext team, from sales@technext.asia. An adviser who sets up Odoo for BIR requirements joins the discovery call.

What do you do with my details?

We use them only to reply. See technext.asia/privacy.

TechNext

You don't need to hire your own team.

An Odoo ERP partner for Philippine SMEs.
Keep your current system. Plug Odoo in.
